

# FLI<sup>®</sup> MINI TUBES

RMO<sup>®</sup>'s New FLI<sup>®</sup> Mini Tubes are specifically designed for partially erupted 2<sup>nd</sup> molars, offering a perfect solution for early stages of bonding. The bonding base features a mesially-extended contour ideal for adapting to a small crown bonding surface. A smooth, low profile design assures both working ease and enhanced patient comfort. FLI<sup>®</sup> Mini Tubes also feature a trumpeted entry to facilitate quick and easy wire changes reducing valuable chair time.

**Material:** Bracket - AISI 17-4PH Stainless Steel  
Molded one-piece construction

Features	Benefits
Smooth, Comfortable Low-Profile Design	Aesthetically inspired with enhanced patient comfort
	Reduced occlusal interference
Mini Tube Design	Perfect for adapting to small crown surfaces as opposed to traditional direct bond tubes
Molded Contoured Base	Superior fit and predictable bonding
	Mesially-extended for ideal placement on partially erupted 2 <sup>nd</sup> molar cusps
Mushroom Style Hook	Added patient comfort through minimized cheek irritation
Flared Entry	Easy wire insertion providing quicker wire changes
Torque-in-Base	Optimal slot alignment reduces guesswork and chairtime
Unique ID	Quick and easy identification saves time

## SECOND MOLAR
